

DISCUSSION QUESTIONS

Military Recruitment

1. Do shortfalls in military recruitment transcend the U.S. and thus are characteristic of all affluent Western nations in general?
2. Are recruitment difficulties merely a transitory phenomenon that will self-correct, or indicative of fundamental challenges?
3. Will AI, robotics, and drones provide an eventual solution to Western militaries' manpower shortages?
4. Do increasing one-child families discourage the military recruitment of young men and women?
5. Do the new high-profile political activism and DEI mandates of the Pentagon discourage enlistment?
